FLOWERS

an activity pack for curious kids

Puzzles
Worksheets
Scavenger hunt
Colouring pages

Welcome to this flower-themed activity pack from Pale Blue Marbles!

This supplements my blog post '[The evolution of flowers](#)', to help your child learn what flowers are, and how they came to dominate our planet and entice animals to carry their pollen.

If you haven't read the post, I recommend going through at least the first part "What is a flower?" with your child before completing these activities.

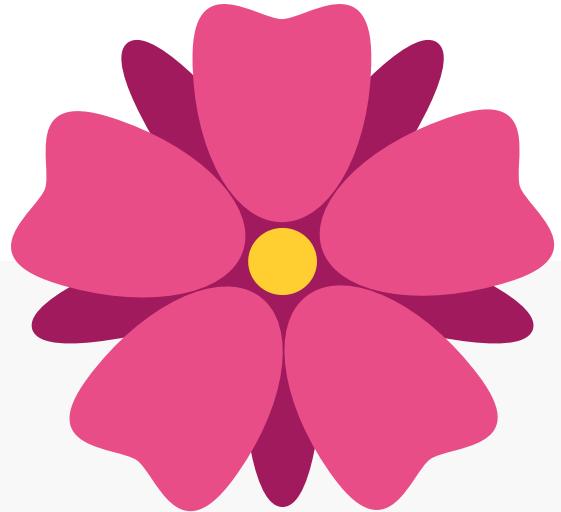

I have included activities at different levels – choose the ones appropriate for your child.

Cultivate curiosity and enjoy!

If you like the activities, please spread the word: comment on the blog posts or on the [Facebook page](#) and invite your friends to like and subscribe!

You can also follow me on [Twitter](#), [Instagram](#) and [Pinterest](#) for more activity ideas and astrobiology.

WHAT'S INSIDE

- Label the flower parts
- Flower dissection sorting sheet
- Flower scavenger hunt
- Design your own flower
- Two flower word searches
- Flower mazes
- Eight colouring pages

Parts of a flower

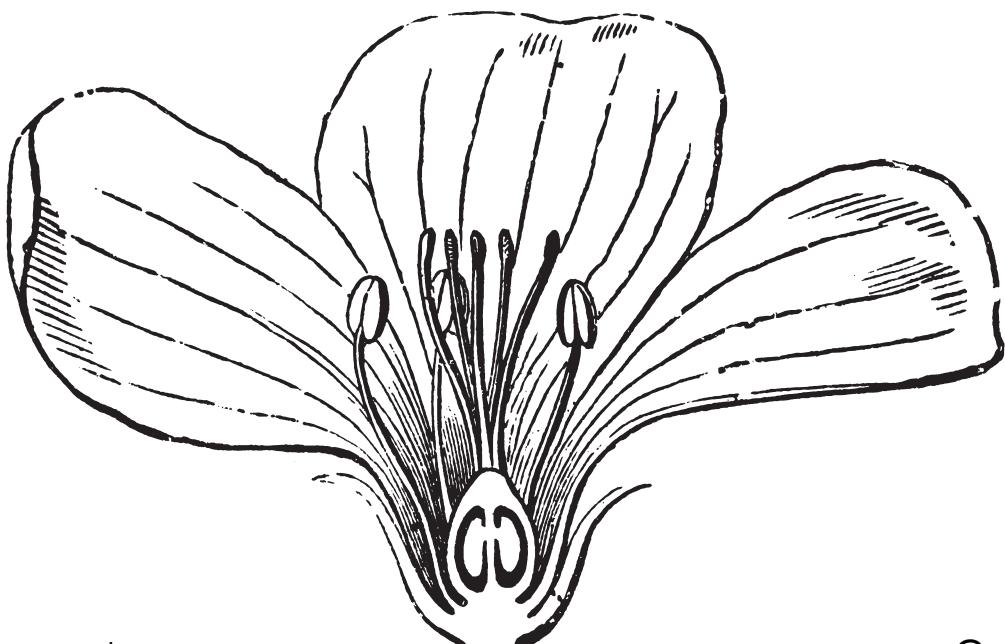

Draw lines to connect the name to the correct part of the flower
then colour the male parts yellow and the female parts green.

Petal

Stigma

Style

Anther

Filament

Ovary

Ovule
